Experience

Frontend Developer

D'Hub Technologies, Nigeria (remote)

May 2025 – present

- Building and conducting bug fixes on the users account for new and existing users.
- Collaborating with product designers to carry out UI updates and adjustments to the users account.
- Collaborating with backend engineers to implement and rectify API endpoints for authentication.
- Making adjustments and rectifications to dynamic state on various static component within the registration forms using react-select and react-phone-input-2.

Frontend Developer

Borough, Nigeria (remote)

Oct 2024 – Jan 2025

- Handled and built the guest account for new and existing users.
- Collaborated with product designers to carry out UI updates and adjustments to the guest account.
- Collaborated with backend engineers to implement push, email and in-app notifications for users in the guest account.
- Collaborated with backend engineers to implement chat/instant messaging feature for communication between host/admin and guest account.

- Also collaborated with fellow frontend developers to develop the admin account using Next.js, Material UI, Tanstack React Tables, and Shadcn.

Frontend Developer

Hotels NG, (HNG), Nigeria (remote)

Jun 2024 – Sept 2024

Tifi Video and Audio converter App:

- Contributed to the development of my team core project
- Delivered responsive and optimized web applications, ensuring seamless integration with backend services.
- Worked closely with backend developers, designers and project managers to meet project deadlines and deliver a high quality product.
- Contributed to code reviews, debugging, and enhancing UI/UX, improving overall user experience.
- Worked hand in hand with another frontend developer to create and implement the resource page for the admin and user side.
- Gained hands-on experience with agile development methodologies and version control using Git and GitHub.
- Project Link: tifi.tv

Telex App:

- Built and developed a product, Telex with other frontend developers that keeps you informed on events like signups, errors, performance and user activity in real time, delivering notifications in a chat like format.
- Built the frontend with modern frameworks such as Next JS, Next Auth, Tailwind CSS, Radix UI.
- Delivered responsive and optimized web applications, ensuring seamless integration with backend services.
- Worked closely with backend developers, designers and project managers to meet project deadlines and deliver a high quality product.
- Utilized Git, GitHub Slack and Linear for collaboration, version control and project management.
- Contributed to code reviews, debugging, and enhancing UI/UX, improving overall user experience.
- Worked hand in hand with the design team to implement various design iterations.

- Project Link: telex.im

Web Developer

Eagle Endeavour Ltd, Nigeria (remote)

Feb 2023 – present

- Implementation and co-design of company website from concept through deployment. This immediately enhanced company publicity and accessibility for clients seeking to inquire about company products and services.
- Recommending solutions for a streamlined, user-friendly interface with the design team.
- Contributing to redesign and UI upgrade of website for better user experience and output, using a mobile-first approach and web frameworks and libraries for faster deliverables.
- Performing bug fixes and code reviews for all aspects of website after redesign.
- Continued maintenance, not excluding updating of content and information regarding products and services.
- Ensuring proper documentation and reports in all stages of product life cycles via version control.
